

With 14 plus years of health care and business experience, Airguard LLC in Fairfield CT is a health care company specializing in providing innovative medical devices to improve airway safety. Airguard, LLC is an American owned business established in the State of Connecticut in 2010.

Core Competencies:

- AIRGUARD, LLC. has a unique and superior capability being a collection of people, processes with unique technology assembled together for the purpose and motto of saving lives and serving humanity.
- This is done specifically by innovative medical devices that save lives by improving patient airway safety as desired by customers.
- Biotechnology services.

Differentiators:

- Provide unique medical devices. There are multiple patents in several countries including USA, Europe, India, China, Hong Kong and Australia for the unique medical devices.
- The laryngeal mask size 4 GNANA LARYNGEAL AIRWAY 4 (GLA4) available in USA is a second-generation laryngeal mask.
- GLA4 allows a gastric tube to be inserted into the stomach.
- Is the only laryngeal mask in the world that has an inbuilt suction to allow for hypo pharyngeal suctioning in addition to gastric suctioning.
- Our second major strength is that our company is the distributor as well and so distribute directly from our warehouse.
- Direct distribution and able to deliver goods to you quickly and on time.

Past Performance:

- Since its inception AIRGUARD, LLC has been working on the manufacture and distribution of unique medical devices.
- Research and development of these medical devices is to serve humanity with the goal to save lives by improving patient's airway safety.
- Airguard LLC from its inception continues to ensure that unique medical devices are developed to increase patient airway safety.
- Clinical studies on the first and second-generation laryngeal mask the Gnana laryngeal Airway has been published on PubMed and internet.
