

Tomorrow's Genius – www.tomorrowsgenius.com

Tomorrow's Genius, incorporated in NY State, provides its clients an online yearly subscription service. You can work with any Algebra or Trigonometry program of your choice. The cost of each program is \$100 for a period of 12 months, and that amounts to less than \$9 per month.

It is recommended that you begin with Basic Algebra. You will have a whole year to work with and review fundamental Algebraic concepts.

The list of topics that are covered under each program are detailed on the website. Each topic is divided into sub-topics and has video lessons, homework and answer solutions and tests and answer solutions.

The video lessons and material have been put together by Math teachers - a Ph.D and an Engineer.
